

your learning management system *your way*

WorldLearn is a proprietary Learning Management System which is designed, developed and supported in Australia. Based on extensive experience in the management of learning, the WorldLearn team has created a solution to meet the local training and regulatory compliance needs.

Other WorldLearn modules include:

- Learning & Development
- Training Plan Management
- CPD Program Management
- Coaching and Mentoring
- Performance Management
- Career Development
- Social Learning
- Succession Planning
- Recruitment & onboarding

WorldLearn gives your organisation tools with which to manage the entire RTO process by;

- Prompting registered users to complete their AVETMISS profile and automatically verifying their Unique Student identification (USI).
- Providing a range of functions that guide users through the process of enrolment, the delivery of learning, online submission of assessments and upload of associated evidence - whilst providing the user with timely communications about the status of their qualification, milestones and scheduled calendar events.
- Verifying that Qualifications or Competencies have been completed successfully and then assisting you in creating, saving and distributing the Certificates and Statements of Attainment whilst maintaining an audit trail of all the transactions.
- Automatically deploying AQTF Learner Engagement surveys to learners on completion of a training event and monitor completion of the surveys.

Set-Up and Integration

WorldLearn enables you to quickly and easily add and update qualifications and/or competencies using a web-link to the training.gov.au database. WorldLearn ensures that all compliance requirements are captured and that the USI is verified before a student can register for a qualification or competency. This also means that the AVETMISS data required for AVETMISS reporting is automatically captured, stored and validated enabling administrators to quickly identify anomalies and to rectify them.

Dashboards and reports

WorldLearn provides a range of reports that are designed to support each WorldLearn function and course delivery method. These reports are made available to specific roles (configurable) as dashboards, printable reports, data extracts and report wizards. The reporting function within WorldLearn is a powerful tool that assists the RTO administrator to identify potential delays in the overall process of targeted completion, actual completion, verification and issuance of appropriate documents in support of ASQA compliance.

Automate your Registered Training Organisation (RTO) Processes

- **WorldLearn** is a feature-rich, web based system designed to help Registered Training Organisations (RTO) meet **organisational, ASQA and NCVER** requirements.
- **AVETMISS profile and USI details:** An automated process that ensures the AVETMISS profile has been completed and USI verified.
- **Manage class enrolment, completions, on the job training and assessment:** Let the system guide you through the process of enrolment, delivery of learning, online submission of assessments and upload of associated evidence.
- **Manage Certificates and Statements of Attainment:** Verify that Qualifications or Competencies have been completed successfully with automated processes.
- **AQTF Learner Engagement surveys:** automatically deploy surveys to learners on completion of a training event.
- **Manage Qualifications / Competencies:** add and update qualifications / competencies using a web-link to the training.gov.au database.
- **Enrol Learners:** WorldLearn provides a number of avenues for enrolling learners from self-enrolment (subject to approval) or enrolment by a Manager, Facilitator or Training Administrator - configured to organisational requirements.
- **AVETMISS and organisational Reporting:** Access a range of standard reports and generate all AVETMISS reports.
- **Flexibility:** match your organisation's needs with WorldLearn options.

Customisation

Further customisation of WorldLearn is available, making WorldLearn the most flexible Learning Management System currently available. Our team will partner with your business to design and build additional features so that WorldLearn can be the single, unified repository of learning and development data that you need.

Expertise

Our team has extensive expertise in developing and implementing successful corporate eLearning solutions.

WorldLearn has invested in assembling a highly skilled and client dedicated team with a client list that speaks for itself. WorldLearn invests in its people and that dedication transfers to the client, prompting excellence in all phases of the partnership.
